Ex-10 Interfacing with routers in Cisco Packet Tracer Simulator.

Aim:- To design and configure a simple internetwork using a router wireless router, DHCP server and internet in cisco packet tracer.

Procedure:-

1. Interfacing using a router
2. Open cisco packet tracer and add one router (Router 1) and two PCs (PC0, PC1)
3. Connect both PCs to the router using copper straight through cables.
4. Configure the router using CLI.
5. Configure IP
6. Set the wireless router SSID to homenetwork and enable DHCP.
7. Connect the laptop to homenetwork & configure PC using DHCP.
8. Enable DHCP & DNS services on the server.

Result:-

The Interfacing was successfully designed configure in cisco packet tracer, router communication, wireless, connectivity DHCP were verified successfully
