Ex 12-(a) Chat client-Server using TCP/IP Sockets

Aim:-

To implement a chat client-Server application using Socket and enable Communication b/w multiple clients through a Server.

Procedure:-

1. create a chat Server Program using Socket Programming
2. Start and run the chat Server.
3. create the chat client Program and Connect it to the Server.
4. Run two (or) more client Programs in Seperate terminals.
5. Enter a name for each client.
6. Send messages from one client to the Server.
7. The Server broadcasts the message to the other connected clients.
8. Verify that the clients can exchange message through the Server.
9. Continue the Communication b/w the clients
10. Enter/quit to terminate a client Connection

Result:-

Thus the chat client-Server application was Successfully Implemented and message were Successfully exchanged b/w Multiple Clients through the Server.
